

Home UV-C & HEPA Filtration Packages

Making your home a safe space is more important than ever. High Efficiency LLC has teamed up with CRiMSON Medical to provide a Disinfection System that is designed to provide your family, friends, and guests with clean air free of contaminants. The system utilizes UV-C (Ultraviolet) technology and HEPA grade filters, two of the few options that mitigate infectious diseases from the air. Both UV-C and HEPA filters have been tested and proven to eliminate COVID-19. Our expert team will design and install a system that will help make your home safe and healthy.

CRiMSON Medical, founded by Dr. Kevin Kelly is the leader in UV-C and HEPA technologies has teamed up with manufacturers CureUV & Austin Air to offer a new approach to Home air disinfection. Our approach provides a solution that will allow your family, friends, and guests to breathe safe.
